

# Tell SHELL NO to Environmental Genocide!!!

Shell Oil wants to drill in the Arctic if we allow that to happen:

- According to the U.S. government; there is a **75%** chance of a major oil spill.
- Indigenous peoples on the Beaufort & Chukchi seas rely on the ocean to live and sustain their way of life, so when a spill happens they will not be able to sustain their life.
- According to the Coast Guard Commandant there is no way to clean up an oil spill in the Arctic.
- Built to fail: Pipes carrying oil will be installed in the seafloor. When winter comes, the ice digs into the sea floor where the pipes are. We can only hope that a pipe does not get hit but it is built to fail.
- Once we burn the oil from the Arctic we will ensure a 2 degree Celsius change which will mean:
  - \* Super Droughts – Bread Basket Midwest, unable to produce food, cost of food go up. We could end up having to import food.
  - \* Mass Extinctions- Desertification, famines, destruction of habitat for humans and other.
  - \* Extreme Sea Level Up to 32 Ft, which would drown major coastal cities ex: Miami, ALL OF THE PHILLIPINES!!!
  - \* Contaminating Fresh Water Supplies
- **WE CAN STOP THIS:** January this year 3 companies withdrew their drilling leases Greenland's Arctic waters.

**INDIGENOUS PEOPLES IN ALASKA AND AROUND THE WORLD ARE CONTINUING THE MORE THAN 520 YEAR FIGHT AGAINST COLONIALISM AND TO PROTECT THE LAND AND OUR CHILDRENS FUTURE.**
